

Practical – 1

AIM: Create a web page demonstrating “Spoural Event ” and its description, providing a link for registration page. Registration form of the student for “Spoural Event" having different fields like type of event, event listing, Student ID/Group, Branch, etc.

Source Code:

(Home page)

```
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta http-equiv="X-UA-Compatible" content="IE=edge">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Spoural Event</title>
  <style>
    *{
      font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
      font-weight: 500;
      font-size: 20px;
      font-style:normal;
      font-variant:small-caps;
      text-align: center;
    }
    h1{
      text-align: center;
      font-weight: 700;
      font-size: 50px;
      height: 300px;
      background-image: url(/wt.jpeg);
```

```
        background-repeat: no-repeat;
        background-position: top;
    }
    a{
        text-decoration: none;
    }
    img{
        width: 450px;
        height: 300px;
    }

</style>
</head>
<body>
    <h1>

</h1>
    <div class="contain">
        <div class="register">
            <p>The most awaited Event is here.</p>
            <p>SPOURAL 2023</p>
            <a href="/registration.html">REGISTRATION FORM</a><br><br>
        </div>

        <div class="data">

Conclusion:

From this practical, I have learned how to structure html elements in block format to get desired and optimized results. I have learned how to divide content in block and inline. Also, I have used CSS properties to manipulate content format.

Course Outcome:

This Course is helpful for basic knowledge of web technologies. I will learn how to make the web interactive, responsive and user friendly. Also I will learn how to code logic using Javascript.
